

Aerchute HummerChute model has received UK CAA type certification

Aerchute HummerChute model has received UK CAA type certification. It is the only legal two-seater powered parachute in UK!

Here is the news from Advance online magazine.

CASA approved disc brake and cruise control kit

Cruise Control

It is always good to have some improvements for your Aerchute. One of the options people have asked for is cruise control so we have designed a cruise control unit that is safe, affordable and easy to install.

The Cruise Control was originally designed and approved for the HummerChute. It is now approved for the Aerchute Dual. We have redesigned the original foot throttle stop which can now have a dual purpose to also hold the cruise control throttle cable. The structure is also improved to prevent it from bending due to heavy load.

The cruise control lever is placed on the right hand side in front of the front seat bar for easy access. It is very easy to operate. The pilot simply controls the foot throttle bar as usual and then locks the throttle bar in position using the lever. You can easily unlock the throttle either by the lever or your foot to flick the throttle bar back to the original position.

Disc brake

The disc brake was also originally designed and approved for the HummerChute. With the new approval, it is now available for Aerochute Dual owners too!

The disc brake kit consists of two sets of brake discs and callipers, wheel mounts and brake handles. The disc brake is fitted to the rear wheels and the brake handles is mounted on the right hand side of the seat. The disc brake has been used and loved by many HummerChute owners. It not only reduces the landing distance effectively but can also be used as a steering brake with the brake handles.

Brake handles

The disc brake and cruise control kit are available now and sold separately. They come as a kit with installation guide so that you can install it by yourself. We also provide installation service when requested.

HummerChute Type Certificate and Service Bulletin

Dear HummerChute owners,

CASA has finalised the approval documents and issued a type certificate to signify the airworthiness of the HummerChute.

CASA has issued service bulletins for all the HummerChutes with frame No. between 376-463. These aircraft are required to perform the upgrades in order to comply with the type certificate.

The service bulletins, which can be downloaded here ([Service Bulletins](#)), contain detailed instructions for the upgrades.

- SB-15-30L for HummerChutes with 30L fuel tank
- SB-15-46L for HummerChutes with 46L fuel tank

Once completed, please fill in and sign the compliance form, on the last page of the service bulletin, and send it back to Aerochute Industries.

If you have any questions please contact us on 086-396-0942.
